WLAN

Netis Wi-Fi Router has a amazing high speed, board coverage connection capacity and a variety of flexible functions, which offers a high performance on website surfing, emailing and file sharing for both home entertainment and business work.

Passive PoE WAN Port

With PoE WAN port, WF2411PS supplies maximum 10W power to other PoE CPE device with one Ethernet cable, also enabling data transmission at the same time.

Mode & Function

AP
The AP mode sets up a Wi-Fi network from an existing wired (Ethernet) network so that multiple devices can share the Internet with AP .

WDS
WDS wireless bridge provides seamless bridging to expand your wireless network. It combines users in different LANs into one work group to share documents.

Repeater
By repeating the signal from your home and office router, the repeater expands the wireless range to cover the deadzones and redistributes a new extended location.

Multi-SSID
Multi-SSID supports you to enable 1+3 different wireless networks on one router to set up multiple wireless networks for family and guests.

IPTV

IPTV function offers you a chance to enjoy an interactive network television. It provides customer a variety of interactive services including digital TV.

Band-width Control

Band-width control function gives you the power to control reasonable bandwidth usage for each computer of your network.

Access Control

With IP/MAC/Domain Filtering function, you can setup restricted schedules for specific users, such as denying the access to unsafe websites, or blocking Internet access during children's sleeping time.

DDNS

Dynamic DNS (DDNS) provides a persistent addressing method for remote access for your local devices, such as router, IP camera, FTP server etc.

xDSL

Netis DSL Modern Router is designed to provide an one-stop solution for acquiring and sharing Internet access at ultra-fast speeds over wired/wireless network, which is ideal for faster downloading, online gaming, Internet calling and HD video streaming.

xPON

Netis PON Terminal is equipped with the highly estimated broadband technology, will bring great security and convenience for network management, which is completely ideal for home and small business applications.

EP8101G 1 Port Gigabit EPON Terminal

- 1* SFF/SC PON port, 1* 10/100/1000Mbps auto-negotiation and auto-MDI/MDIX RJ45 LAN port

EP8104 4 Ports Fast Ethernet EPON Terminal

- 1* SFF/SC PON port, 4* 10/100Mbps auto-negotiation and auto-MDI/MDIX RJ45 LAN ports

EP8104P 4 Ports Fast Ethernet Plus 2 POTS EPON Terminal

- 1* SFF/SC PON port, 2* RJ11 phone ports, 4* 10/100Mbps auto-negotiation and auto-MDI/MDIX RJ45 LAN ports
- Complies with SIP or H.248 standard*, allowing for convenient phone calls over the Internet
- Remote management based on TR069 protocol

Common Features

- Complies with IEEE 802.3ah & CTC 2.1
- IEEE 802.3ah compliant EPON ONU device
- Up to 1.25Gbps for upstream/ downstream speed
- Maximum transfer distance up to 20Km
- Automatic discovery and authorization, plug and play
- Bi-directional AES-128 encryption
- Customized Quality of Service for assured SLA
- IEEE 802.1p priority (SP/WRR/SP+WRR)
- Advanced Layer2 switching features, IGMP Snooping, IEEE 802.1q VLAN, STP, Rate Limitation, MAC Address management
- Supports Dying Gasp function
- Remote management based on OAM, Local management through Web-based GUI

EPON Solution

1.25Gbps up and down steam PON transmission rate, ensuring the maximum bandwidth for long-distant voice, Internet, as well as HD video services.

Switch

Netis SWITCH is designed to provide a reliable security and stability for expanding business network. A variety of netis switches are available to offer a great selection for businesses of all sizes, which are ideal choices for manage business networks efficiently within reasonable cost.

Common Features

Standards

- IEEE 802.3, IEEE 802.3u, IEEE 802.3x

Port Features

- Auto Negotiation and Auto MDI/MDIX

Switching Features

- Store and Forward Switching Method
- Full Duplex Flow Control and Half Duplex Backpressure
- MAC Address Auto-Learning and Auto-Aging
- LED indicators for simple diagnostics and management

Management

- Plug and Play

Other

- Green Ethernet/Power Saving

Company Profile

Founded in 2000, Netis Systems is a professional provider of networking products and solutions. With state-of-the-art technology, outstanding product quality and satisfying customer service, NETIS SYSTEMS has become a major provider in the data communication industry, with a growing reputation for reliable products worldwide.

Netis Systems has established 5 R&D Centers in Chengdu, Xi'an, Shenzhen, Taipei, and Korean, a 50000m² factory in Dongguan, more than 50 branches in China main cities.

Netis Systems' product family covers Wireless Router, Wireless Adapter, Powerline, Switch, xDSL, xPON, 3G/4G, Network Adapter, and is gradually involving into Storage, Security, Multimedia and other fields.

In order to provide quick and comprehensive services to global customers, Netis Systems also sets up branches in North America, Europe, Taiwan and Korea.

"Easy network, Trustable" netis is your reliable choice.
